

Course Reference: TOCV-0001

TOC for Beginners Course**Lectures and Practical work**

Principles of TOC

Practical applications of TOC

Develop a calibration Curve

Perform sample analysis

Application Troubleshooting

Review TOC-V WS, TOC-V CSN/CSH instruments

User Maintenance

Course Objectives

This course is open to all industries and will be targeted at those individuals who are new to the concepts and the subject of TOC analysis and associated instrumentation. The basic principles of TOC theory and practical applications will be explored and explained. The application and use of TOC equipment and analytical techniques in a range of industries will also be discussed. Attendees will be encouraged to participate in the operation of Shimadzu TOC-V Wet Chemical and TOC-V Combustion based instruments through straightforward practical exercises including forming a calibration curve and performing simple analyses. During the course, routine user maintenance of TOC-V instruments will be explained.

Course Prerequisites

Customers will preferably have had some exposure to Shimadzu TOC-V instruments. However, the course is designed for first time users and will assume no previous knowledge of TOC analysis.

Course Dates Q3 200630th August 200627th September 2006**Course Fees**

The course fee is £350 per person plus VAT. Course certificates will be issued to each delegate. This price does not include hotel accommodation or transportation. Fees include refreshments and a buffet lunch.

Course Numbers

Course attendance numbers are restricted to ensure that everyone on each course receives the best possible levels of tuition and the appropriate levels of support during practical sessions. The maximum number of attendees on this course is six.
