

Shimadzu LCMS-9030 and MALDI-8020 time limited offer

# Cover all bases with **MALDI/LCMS** combined

Get state-of-the-art **MALDI-8020** and newly released **LCMS-9030** in a **combined package** for **optimum value**.

The recently launched LCMS-9030 provides patented Q-TOF technology for the fastest, highest sensitivity analysis to date.

With a small foot-print, the MALDI-8020 provides quick, accurate bench-top MALDI-TOF analysis, with rapid sample loading and data acquisition.

**Use the powerful combination of both instruments for the full complement of results. Gain unrivalled MS output for your lab, at a great price.**

# Two Instruments. Complete Analysis. Optimum Value.

## Advantages of using parallel MALDI-TOF and Q-TOF LC/MS analyses

The use of two machines, with separate ionization sources, can broaden MS coverage and data output for your sample analysis. Advantages include a wider analytical space, improved dynamic range and enhanced sample depth. The parallel use of MALDI-TOF and LCMS QTOF analyses allows you further control of your samples by having a choice of ionization techniques ready to use, without the need to change set ups in a single machine.

## Benefits to your research

- Increase data quality and output for each individual sample
- Expand your throughput – report more in less time
- Improve sample depth and diversify the chemical space available for analysis
- Gain a wider range of applications with MALDI and LCMS in parallel
- Use MALDI for a fast prescreen option, prior to LCMS
- Make your funding go further with our competitive price for two instruments (time limited offer)

## Advantages over other systems

**Speed of analysis:** Both LCMS-9030 (Q-TOF-LC/MS technology) and MALDI-8020 (MALDI Q-TOF technology) offer fast analytical speed compared to alternative systems

**Cost:** For a limited time, MALDI-8020 and LCMS-9030 are offered together as a package with reduced pricing, making your funding go further

**Enhanced Mass Spec capabilities:** Significantly enhance your lab's Mass Spec capabilities, with two state of the art instruments, often for the comparable price of a single machine

**Improved quantitative and qualitative analysis:** MALDI used in parallel with Q-TOF LC/MS technology provides key advantages in the breadth and quality of your analysis.
